

Sami Hamdan

Full Stack Developer

New York, NY

Practiced in Ruby and Javascript programming, with experience using popular frameworks (Angular, React, Rails). Hardworking, intelligent, people person driven to become a better programmer and an asset to your company.

Experience

President

Broad Wash

Bloomfield, NJ

Jan 2009 - Aug 2016

I was the owner and operator of this small business. Handled all personnel, inventory, payroll, and day to day operations.

Regional Field Director/Data and Digital Director

Obama for America

East Brunswick, NJ

Dec 2011 - Jan 2013

Rose from intern, to office manager, to field organizer, and eventually RFD and director of Data and Digital for NJ. Responsible for statewide data collection, entry, reporting, and training of volunteers across the state.

Projects

Sammit

Sammit is a replica of the popular internet message board site, Reddit. The purpose was to get me comfortable using Rails.

What's Next

This application was also built using Rails and is a self-deleting ToDo application.

Get-it-Done

I built Get-it-Done as a way of getting practice gaining more comfort with API integration. It is an externally usable API that allows users to update their ToDo list from the command line.
